# What is web development?

Web development refers to the creation, building and maintenance of a website. Web development is made up of two words web and development, in which web means the webpage or website and development refers to the building of the application from scratch.

# Frontend Development

It is the part of the website which is directly visible to the user to which he can interact with. It is also known as the client side of the application as it is visible to the user.

# Backend Development

It is the part of the website which is not visible to the user and he cannot interact with it. It is the server side of the website which is used to process, store and arrange the data.

# Full Stack Development

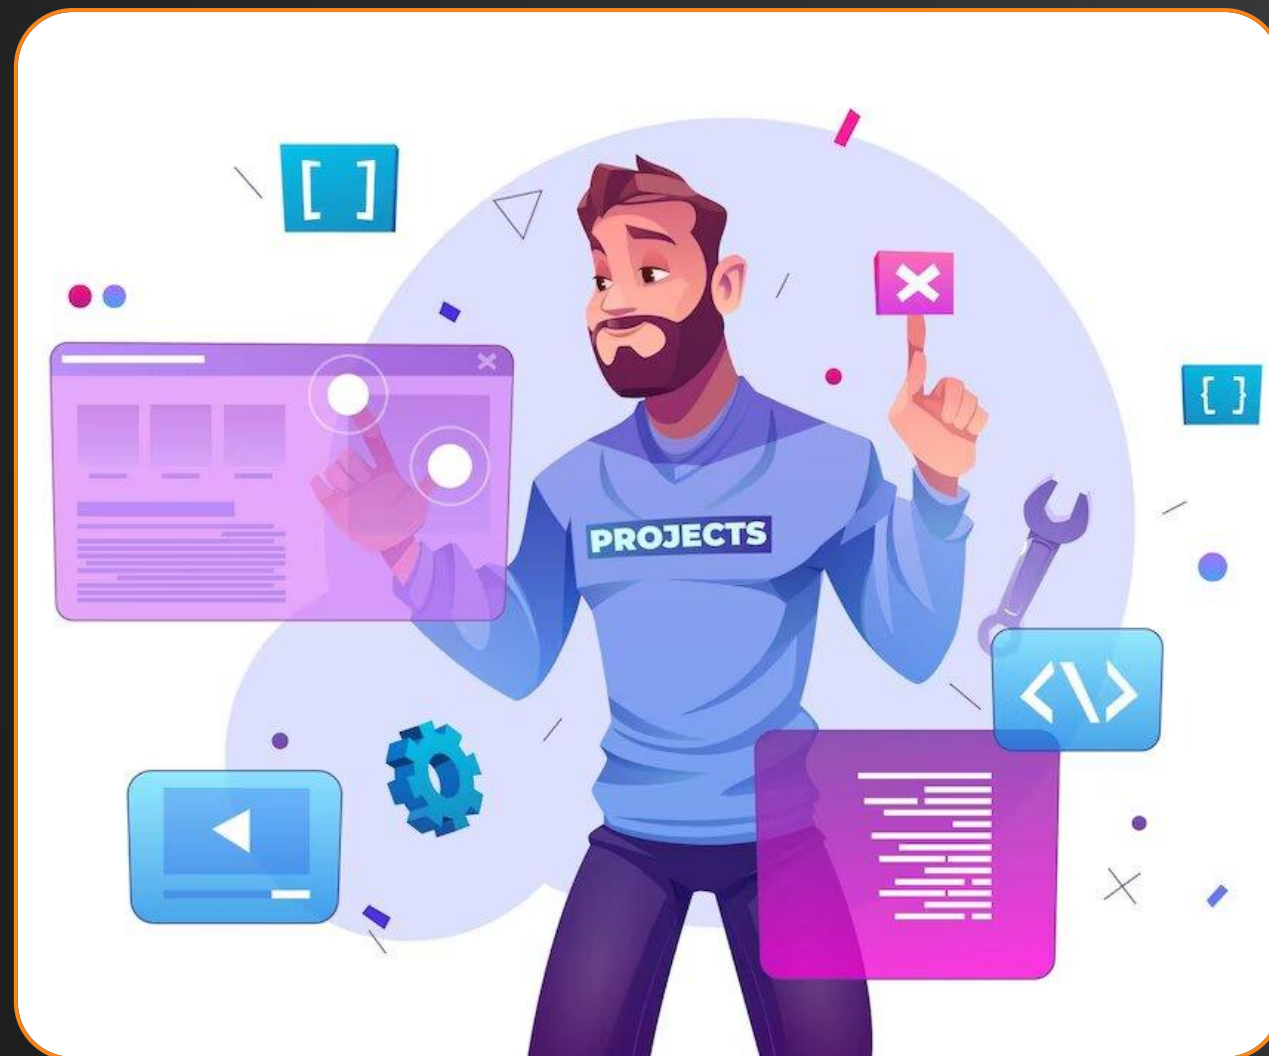

Full stack development refers to the ability to work on both the frontend and backend side of a web application.

FULLSTACK DEVELOPER
